Enterprise Applications | Application Support | APIs & Business Systems | Kigali, Rwanda | +250 787 444 019 | sanofiston04@gmail.com | <https://fistonsano.vercel.app> | <https://linkedin.com/in/fiston-sano> | <https://github.com/FistonSphere>

SUMMARY

IT and Software Engineering professional with over three years of hands-on experience developing, supporting, and maintaining enterprise applications and business systems. Experienced in application administration, software development, application troubleshooting, database management, REST API development and integration, system deployment, access management, and business process improvement.

Strong technical background in Laravel, PHP, React.js, Next.js, TypeScript, JavaScript, SQL, MySQL, PostgreSQL, and REST APIs, with practical experience implementing authentication, authorization, role-based access control, application configuration, system testing, and technical documentation.

Experienced in working with end users, stakeholders, and cross-functional teams to understand business requirements, resolve application issues, maintain system reliability, and deliver technology solutions that support business operations.

Currently completing a Bachelor of Information Technology at the University of Kigali, with graduation expected in November 2026. Seeking a professional internship, graduate opportunity, or junior technology position within a structured financial-services or enterprise technology environment.

EDUCATION

University of Kigali

Bachelor of Information Technology (BIT), Currently completing final academic requirements., Expected graduation: November 2026., Relevant areas include: Information Security • Computer Networks • Database Systems • Operating Systems • Software Engineering • Web Development • Computer Programming • Systems Analysis & Design • Software Testing, Practical academic work has included secure application development, authentication and authorization, database security, REST API implementation, and business-system development.

ES. Marie Adelaide

High School Diploma (A2)

2019 – 2022

EXPERIENCE

IT Officer / Software Developer

2023 – June 2026

Marchal Real Estate

- Designed, developed, and maintained enterprise web applications using Laravel, React.js, Next.js, and MySQL.
- Built and maintained RESTful APIs supporting internal business systems and third-party integrations.
- Designed relational database structures and optimized SQL queries for operational activities, reporting, and data management.
- Supported enterprise applications through troubleshooting, testing, maintenance, configuration, deployment, and continuous improvement.
- Implemented authentication, authorization, role-based access control, and user permission management across business applications.
- Supported application reliability, data integrity, security, and effective management of business-system information.
- Developed dashboards and reporting functionality to support operational and management decision-making.
- Contributed to business process automation and digitization of operational workflows.
- Worked with stakeholders and cross-functional teams to understand business requirements and translate them into technology solutions.

- Investigated application issues and supported their resolution through troubleshooting and technical analysis.
- Maintained technical documentation covering applications, APIs, configurations, and business processes.
- Supported end users and business stakeholders in the effective use of technology solutions.

PROJECTS

APIFlow — API Lifecycle Documentation & Version Management Platform | Laravel • React.js • Next.js • TypeScript • REST APIs • MySQL

- Designed and developed a centralized platform for API documentation, lifecycle management, and version control.
- Developed relational database structures supporting APIs, documentation, versions, and lifecycle information.
- Built REST APIs supporting platform functionality and integrations.
- Implemented authentication, authorization, role-based permissions, and access controls.
- Applied input validation and security-focused development practices to API functionality.
- Developed workflows for API documentation, version management, and change tracking.
- Developed reporting and analytics dashboards for API-related information.
- Performed testing, debugging, maintenance, and continuous improvement.
- Relevance: Demonstrates API management, enterprise application architecture, access control, documentation, database design, and system governance capabilities.

Ihuriro — Real Estate ERP / Business Management System | Laravel • PHP • React.js • MySQL

- Developed an enterprise-oriented ERP and business management solution.
- Designed workflows supporting operational business processes.
- Developed management dashboards and reporting functionality.
- Automated repetitive workflows and centralized business information.
- Implemented authentication, roles, permissions, and access controls.
- Managed data integrity and security across business-system functionality.
- Translated business requirements into scalable software solutions.
- Performed system testing, troubleshooting, maintenance, and continuous improvement.
- Documented technical solutions, APIs, and business processes.
- Relevance: Demonstrates enterprise systems, business-process understanding, data management, user access control, reporting, and application support capabilities.

Marchal Real Estate Management Platform | Laravel • React.js • Next.js • MySQL

- Developed a business management platform from the ground up.
- Implemented authentication, administrative functionality, property management, and reporting.
- Integrated accounting and sales tracking functionality.
- Developed supporting database structures for business operations and reporting.
- Conducted application testing, debugging, and system maintenance.

TECHNICAL SKILLS

Enterprise Application Support

Application Administration

Software Engineering

Business Systems Support

REST API Development & Integration

Database Design & SQL Development

Application Troubleshooting

Incident & Problem Management

System Monitoring & Maintenance

Software Deployment & Configuration

Authentication & Authorization

User Access & Role Management

Business Process Automation
Software Testing & Quality Assurance
Technical Documentation
Business Requirements Analysis
Data Management & Reporting
Cross-functional Collaboration

Languages: PHP, JavaScript, TypeScript, SQL, Python, HTML5, CSS3

Frameworks: Laravel, React.js, Next.js, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL, Microsoft SQL Server, SQLite, MongoDB

APIs & Security: REST APIs, API Integration, Authentication, Authorization, Role-Based Access Control, Input Validation

Systems: Linux (Ubuntu), Windows Server, Windows

Tools: Git, GitHub, Composer, Vite, Postman

Cloud & Hosting: Vercel, Cloudflare, cPanel, SiteGround

Analytical Problem Solving
Application Troubleshooting
Software Engineering
Database Management
API Development & Integration
Business Process Analysis
Technical Documentation
Security & Access Management
Stakeholder Communication
Cross-functional Collaboration
Continuous Learning
Business Systems Thinking
